

**The Drivalia Recharge app arrives in Turin.
With Leasys Rent, electric charges in the city are within range**

- **Created in partnership with Bosch, the new app is now available on Android and Apple stores.**
- **With the app, access is now available to Leasys Rent's network of 480 charging stations in Turin also to the general public.**
- **The app makes it possible to locate the available charging stations, activating navigation towards the desired charging station.**

Turin, 19 September 2022

Starting today, the atmosphere in Turin becomes even more electric. **Leasys Rent**, an FCA Bank Group company specializing in car rental and subscription plans, **is launching the Drivalia Recharge app**, opening up its electric charging stations in the city to the general public. The creation of the app, made **in partnership with Bosch**, marks an important moment in Leasys Rent's commitment to supporting sustainable mobility in the city. In fact, it is not by chance that the announcement is made during European Mobility Week.

Available on Android and Apple stores, the Drivalia Recharge app enables everyone to access the **network of 480 charging stations**, with power of up to 22 kW, and the related parking areas distributed throughout the city, which originally were only available to Leasys Rent's and Leasys's car rental or sharing customers. A network designed to expand soon. In fact, with a view to boosting charging infrastructures in Turin, the company has announced its intention to increase the total number of electric charging stations in the Piedmont capital to 560 in the coming months.

Drivalia Recharge was developed to ensure fast and intuitive management of charging sessions for electric or hybrid cars. It also makes it possible to **locate available charging stations** in the surrounding area (by filtering them according to connector and power) and to activate **navigation to the desired charging location**. It is also possible to maintain a **"logbook"** to keep track of the number of charges and total energy charged, and to save the most frequently used charging stations on the map.

"The spread of charging infrastructures is the basis for zero-emission mobility. With Drivalia Recharge, city charging becomes even more accessible and smartphone-

*friendly," says **Paolo Manfredi**, CEO of Leasys Rent. "Leasys Rent has long been committed to advancing environmentally friendly mobility. We are therefore proud to announce the launch of Drivalia Recharge in our hometown of Turin".*

FCA Bank

FCA Bank is a bank engaging mainly in car and mobility financing. FCA Bank S.p.A. provides financial products to support the sales of prestigious car brands in Italy and in Europe. Loan, lease and rental and mobility financing products provided by FCA Bank are specifically designed for the sale networks, for private customers and corporate fleets. FCA Bank has a presence in 17 European countries and in Morocco, directly or through branches. At June 30, 2022 FCA Bank had a loan and lease portfolio of approximately €25.8 billion.

Through Leasys Rent, which specializes in rental and subscription solutions, the Bank provides a comprehensive and innovative system of mobility services. At the end of 2019, Leasys Rent launched the first car subscription service in Italy with Leasys CarCloud. In June 2019, thanks to Leasys Rent, it launched the Leasys Mobility Stores, physical outlets with a grassroots presence across Italy. With the launch of the first totally electrified Mobility Store in Torino Caselle airport in 2020, followed by many others, Leasys Rent has become a key operator also for sustainable mobility. In fact, thanks to the over 1,300 charging stations installed in all the Stores, Leasys has Italy's largest private electrified network. In 2022, the electrification project will continue also in the European countries in which Leasys Rent operates.
